

SYNOPSIS OF THE PROJECT

Roll No & Name	35, Ashiq J Maliekal
Name of Guide	Dr. Deepa Mary Mathews
Contact Number:	9495103096
Email id	ashiqjose123@gmail.com
Shared folder/git repository details	github/Ashiqjose35/miniproject
Project Title	Song Recommendation System using Facial detection
Description of Project:	
<p>Face recognition technology has widely attracted attention due to its enormous application value and market potential. It is being implemented in various fields like security system, digital video processing, and many such technological advances. Additionally, music is the form of art, which is known to have a greater connection with a person's emotion. It has got a unique ability to lift up one's mood. Relatively, this project focuses on building an efficient music recommendation nsystem which determines the emotion of user using Facial Recognition techniques. On a larger dimension, this would render salvage of time and labor invested in performing the process manually. The overall concept of the system is to recognize facial emotion and recommend songs efficiently. This system will b eboth time and cost efficient</p>	
Front end and Backend Tools	Back end: python
